

The project ENTeR started in July

The Italian company Centrocot hosted on 19 and 20th July 2017 in city of Busto Arsizio the kick-off-meeting of the project ENTeR in which INOTEX Ltd. participates.

The transnational project ENTeR funded by Interreg CENTRAL EUROPE programme focuses on waste reduction in textile industry and its use. It aims to support the innovative solutions in waste management, to strengthen innovation capacity of textile companies in Central Europe and to improve their cooperation on waste management.

The duration is from 07/2017 till 06/2020; within the project will be established the virtual centre (the on-line platform) which will accelerate cooperation between the involved textile territories, promoting a joint offer of innovative services by the main local research centres and business associations focused to processing and recovery of textile waste. The aim is to demonstrate the benefit of an operational collaborative model amongst research and business partners, based on an online tool and shared skills focused on waste eco design and resource efficiency.

In the project participate 10 partners for 5 central European countries: Italy (Centrocot SpA, UNIVA – Industrial Union of the Province of Varese), Czech Republic (INOTEX spol. s r.o., ČTPT- Czech Technology Platform for Textile), Germany (SACHSEN!TEXTIL e.V., STFI – Saxon Textile Research Institute), Hungary (INNOVATEXT, PBN – Pannon Business Network Association) and Poland (PIOT – Federation of Apparel & Textiles Industry Employers, IW – Textile Research Institute).
