

Project financed by Ministry of Education, Youth and Sports (Czech Republic)  
EUREKA 8083! **TickoTEX**

Duration: 04/2014-12/2016

*Tick repellent multifunctional protective textile materials*

In the frame of TickoTEX project R&D of new multifunctional textile structures containing bioactive components extracted from plants, determined for reduction of risk of tick attack of humans has been initiated. The developed technologies are aimed to the achievement of long-term effects based on slow release of newly formulated active components incl. suggestion of relevant maintenance procedures for reduction of risk of tick attack, i.e. also for infections transfer prevention.
